PROFESSIONAL SUMMARY

Operations and systems-focused professional with 8+ years of experience in data operations, quality assurance, technical support, and workflow optimization. Strong background in translating complex policies into scalable processes and building internal tools and dashboards to improve efficiency. Recently expanded into web-based internal systems development using Node.js, Express, MongoDB, and Vanilla JavaScript. Adaptable across technical, operational, and leadership-focused roles. Actively leverage AI tools to accelerate learning, streamline documentation, prototype internal systems, and improve workflow efficiency.

SKILLS

Web & Systems Development

HTML, CSS, Vanilla JavaScript • React (Vite), Node.js, Express, MySQL (project-based) • JWT Authentication • Git & GitHub • Responsive UI • Role-based dashboard systems

AI & Automation

AI-assisted development & workflow optimization • AI tools for documentation, debugging, and system design • Prompt-based problem solving • Automation-oriented thinking

Operations & Quality

Process documentation & workflow design • QA & policy compliance • Data accuracy & audit support • Process optimization & standardization

Technical & Operations

GIS platforms (Atlas, Calypso) • Google Sheets & internal reporting tools • Technical troubleshooting

PROJECTS

LeaveFlow – Role-Based Leave Management System

Built a full-stack leave management system implementing role-based dashboards and a complete approval workflow.

- JWT authentication and role-based access control
- Employee leave submission with overlap prevention
- Manager approval/rejection workflow (comment required on rejection)
- Automatic leave balance deduction and restoration

- Auto-expiration of pending leave requests
- Paginated history with real-time dashboard summary
- Responsive UI (desktop & mobile)

Tech: React (Vite), Node.js, Express, MySQL, JWT, Tailwind CSS

Developed through structured planning and iterative development, leveraging AI-assisted prototyping for efficiency.

Habit Tracker v1.2

State-driven productivity web app with persistent storage, streak tracking, and dark mode.

Tech: Vanilla JavaScript, HTML, CSS

Personal Portfolio Website

Responsive portfolio showcasing projects and downloadable CV.

WORK EXPERIENCE

Process Trainer | Wipro (supporting Google) — 2023–Present

- Designed standardized onboarding workflows to ensure consistent policy adherence and data quality
- Developed scalable documentation and instructional materials for operational support
- Translated Roads & Traffic Law policies into actionable workflows, reducing interpretation errors
- Streamlined tracking and reporting using Google Sheets and internal tools (up to 90% efficiency gain)
- Performed geospatial data QA using proprietary GIS platforms (Atlas, Calypso)

Geospatial Data Operator | Wipro (supporting Google) — 2022–2023

- Analyzed and validated traffic and speed limit data to mapping standards

Customer / Technical Support (Capital One, Verizon, Comcast) — 2017–2021

- Resolved complex account and technical issues while maintaining compliance and service quality

EDUCATION

Bachelor of Science in Computer Science — Bicol University

CERTIFICATIONS

CSE Professional Passer • Train the Trainer (Wipro PH) • Google Cloud GenAI – L1
